FOOD PRESSURE-COOKING DEVICE WITH A COVER MODULE

5 The present invention relates to an appliance for cooking food under pressure, the appliance comprising at least:

 • a vessel and a lid for being fitted and locked on said vessel in order to form a leaktight cooking
10 enclosure;

 • one or more jaws for locking the lid relative to the vessel; and

 • drive means for driving said at least one jaw between a locking position and an unlocking position;
15 the appliance being characterized in that it includes a module for fitting on and releasably securing to the lid, said module including at least a device for controlling locking and unlocking of the lid relative to the vessel.

20 It is applicable to domestic appliances for cooking food under pressure.
